

# Epley maneuver for posterior canal Benign Paroxysmal Positional Vertigo (BPPV)

Picture demonstrates treatment for *RIGHT* side

**REPEAT:** 2-3 x day if needed. Stop if there is no vertigo or symptoms get worse. You should see improvements after each maneuver. You can do before bed or when you wake up in the morning.

Start sitting on a bed and turn your head 45 degrees to the right. Place a pillow behind you so that on lying back it will be under your shoulders.

Lie back quickly with shoulders on the pillow and head reclined onto the bed.

Hold position for 30 seconds

Turn your head 90 degrees to the left (without raising it) and

Hold position for same amount of time as position 1

Turn your body and head another 90 degrees to the left and wait

Hold position for same amount of time

Sit up on the left side.

BE CAUTIOUS with getting up, wait until you feel steady
